

# First Draft of External Design Document

# Introduction

*The draft of external design document serves as a bridge between the conceptual vision of a software project and its practical implementation. It provides an overview of the design and functionality of the project. It outlines the scope of the project, defines the target audience, and describes the key features and functionalities. This draft shows the initial design layout of the app and its purpose. It shows how the system app will appear and function from the viewpoint of users and how it will interact with existing work process.*

# Wireframes for Top-Level Features

## Home Feed

The home feed wireframe showcases the main feature of the app, displaying a personalized feed of photos and videos from the user's network.

## Sign In

A wireframe of a sign-in screen. It features a logo at the top left, followed by a "Sign Up" link. Below that are two input fields for "Email or Username" and "Password". A central "Log In" button is positioned between the input fields. To its right is a "forget Password?" link. At the bottom, there is an "Other Option" section containing four social media logins: Facebook (f), Google (G), Apple, and Gmail (Gmail icon).

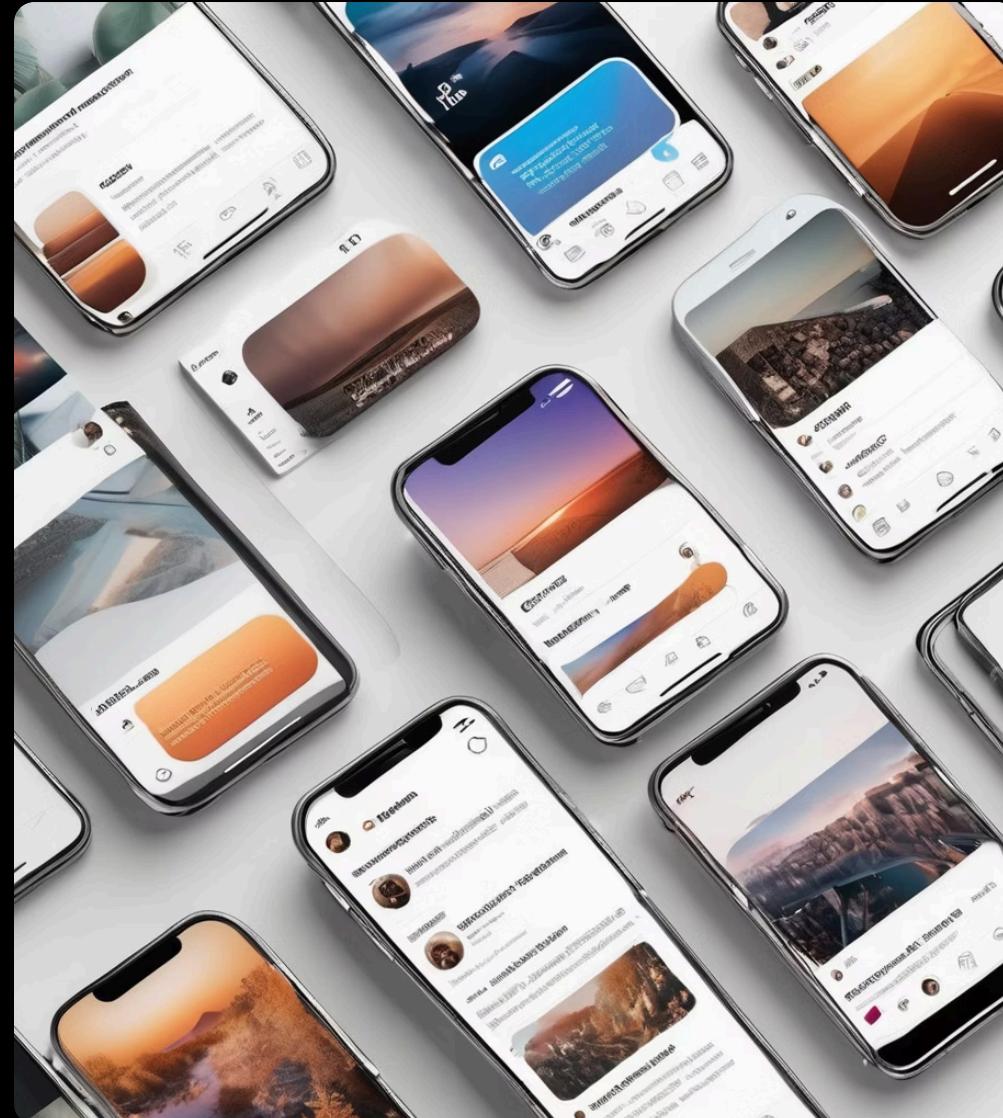

## Login Screen

The login screen wireframe provides a simple and intuitive interface for users to log in to their accounts. If they don't have an account yet, they can go to Sign Up and make a new account.

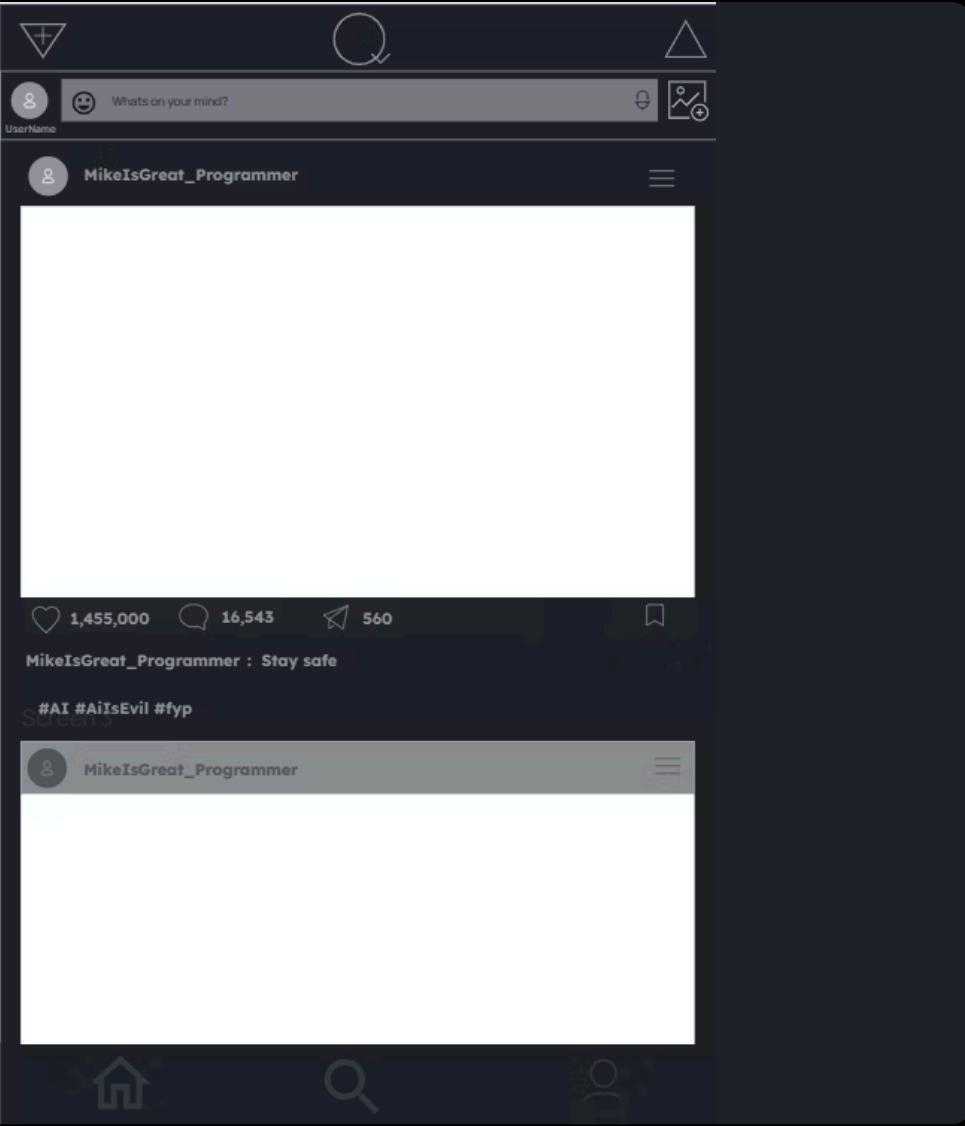

# Initial Screenshots for the App

Below are the initial screenshots for the Zen app:
